DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/13/2005 has been entered.

Response to Amendment

2. Applicant's amendment received on 7/13/2005 is acknowledged and entered. All Independent claims 15, 23 and 28 are amended. Currently claims 15-30 are pending for examination.

Response to Arguments /Election/Restrictions

3.1. Applicant's arguments, see Remarks pages 7-2 filed on 7/13/2005, with respect to claims 15-30 have been considered but are moot in view of the applicant's shift to claiming another invention after an election is once made and action given on the elected subject matter.

Newly submitted and amended independent claims 15, 23 and 28 and their dependencies 16-22, 24-27 and 29-30 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Newly submitted and amended independent claims 15, 23 and 28 recite a new limitation, that is ***comprising a request processing module.....*** (see independent claim 15, claims 23 and 28 and Remarks, see specially page 8, lines 10-20 confirm claiming a new invention ***comprising a request processing module***) has a different and distinct utility than the earlier claimed inventions, that is either capable of recording special file on the destination equipment, when the user's terminal is the destination equipment or downloading of said special file from the user's terminal to the server and then from the server to the destination equipment when the user's terminal is a destination equipment connected to the server but distinct from the destination equipment on which the selection is to be played (see at least currently amended claim 15) . The applicant has already elected an invention, that is originally filed claims 15-30 in the amendment received 9/24/2004 or earlier directed to a device and method for ordering in advance from a user's terminal connected to a server a selection to be played on a destination equipment which did not recite or need a utility for ***comprising a request processing module*** that is either capable of recording special file on the destination equipment, when the user's terminal is the destination equipment or downloading of said special file from the user's terminal to the server and then from the server to the destination equipment when the user's terminal is a destination equipment connected to the server but distinct from the destination equipment on which the selection is to be played.

Therefore the newly submitted amended claims 15-30 are distinct and divergent from the earlier claimed inventions and would require a new, divergent and different

search. Such change in the inventions amount to a " Shift claiming another invention after an election is once made and action given on the elected subject matter and are therefore subject to " Election by Original Presentation". as analyzed above.

Kindly refer to the following MPEP excerpts for guidelines:

819 Office Generally Does Not Permit Shift:

The general policy of the Office is not to permit the applicant to shift to claiming another invention after an election is once made and action given on the elected subject matter. **Note that the applicant cannot, as a matter of right, file a request for continued examination (RCE) to obtain continued examination on the basis of claims that are independent and distinct from the claims previously claimed and examined (i.e., applicant cannot switch inventions by way of an RCE as a matter of right).** When claims are presented which the examiner holds are drawn to an invention other than the one elected, he or she should treat the claims as outlined in **MPEP § 821.03**.

Where the inventions are distinct and of such a nature that the Office compels restriction, an election is not waived even though the examiner gives action upon the patentability of the claims to the nonelected invention. *Ex parte Loewenbach*, 1904 C.D. 170, 110 O.G. 857 (Comm'r Pat. 1904) and *In re Waugh*, 135 F.2d 627, 57 USPQ 371 (CCPA 1943).

.....

821.03 Claims for Different Invention Added After an Office Action - 800 Restriction in Applications Filed Under 35 U.S.C. 111; Double Patenting

821.03 Claims for Different Invention Added After an Office Action

Claims added by amendment following action by the examiner, **MPEP § 818.01, § 818.02(a)**, to an invention other than previously claimed, should be treated as indicated by **37 CFR 1.145**.

37 CFR 1.145 Subsequent presentation of claims for different invention.

If, after an office action on an application, the applicant presents claims directed to an invention distinct from and independent of the invention previously claimed, the applicant will be required to restrict the claims to the invention previously claimed if the amendment is entered, subject to reconsideration and review as provided in **§§ 1.143 and 1.144**

The action should include form paragraph 8.04.

¶ 8.04 Election by Original Presentation.....

.....
An amendment canceling all claims drawn to the elected invention and presenting only claims drawn to the nonelected invention should not be entered. Such an amendment is nonresponsive. Applicant should be notified by using form paragraph 8.26.

4. Therefore, newly submitted and amended claims 15-30 are directed to an invention that is independent or distinct from the invention originally claimed for the reasons given above.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 15-30 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

5. The amendment filed on 7/13/2005 presenting only claims drawn to a non-elected invention is **non-responsive** (MPEP § 821.03). The currently amended claims 15-30 are not readable on the elected invention because they are subject to "Election by Original Presentation". as analyzed above.

6. Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
